

CLAIMS

1. A polypropylene resin composition which comprises:
 - 40 to 80% by weight of a polypropylene component (A) comprising a copolymer of propylene with ethylene and/or a C₄₋₁₂ α -olefin wherein the amount of units derived from ethylene and/or a C₄₋₁₂ α -olefin is 5% by weight or less, or a homopolymer of propylene, and
 - 20 to 60% by weight of a copolymer component (B) containing a copolymer (B-1) and a copolymer (B-2), wherein
 - both the copolymer (B-1) and copolymer (B-2) are copolymers of propylene with ethylene and/or a C₄₋₁₂ α -olefin,
 - in the copolymer (B-1), the amount of units derived from propylene is from more than 50% by weight to 85% by weight, and
 - the copolymer (B-2) is a propylene copolymer where the amount of units derived from propylene is 15 to 50% by weight, the molecular weight distribution (Mw/Mn) by gel permeation chromatography is 3.0 or less, and blockness (CSD) determined using the measured NMR values is 1.3 or less;

in which composition the amount of (B-2) with respect to the whole polypropylene resin composition is 3% by weight or more, and the ratio of the limiting viscosity of the copolymer (B-1) to the viscosity of the polypropylene component (A) ($[\eta]B-1/[\eta]A$) is 1.5 or less, and the ratio of the limiting viscosity of the copolymer (B-1) to the viscosity of copolymer (B-2) ($[\eta]B-1/[\eta]B-2$) is 0.8 or more.
2. The polypropylene resin composition according to claim 1, wherein the weight ratio of the copolymer (B-1) to the copolymer (B-2) [(B-1)/(B-2)] is 1.2 to 6.0.
3. The polypropylene resin composition according to claims 1 and 2, wherein the copolymer (B-2) is a copolymer where there is a heterologous bond, and the unit derived from propylene is 15 to 35% by weight.
4. The polypropylene resin composition according to any of claims 1 to 3, wherein the stereoregularity of the polypropylene component (A) is 96% or more.
5. A polypropylene resin molding which is prepared by molding the polypropylene resin composition according to any of claims 1 to 4, wherein the copolymer component (B) is dispersed either in layers or as needles in the polypropylene

component (A), and the average length (aL) of the dispersed layer is 1.5 μm or longer.

6. The polypropylene resin molding according to claim 6, wherein the molding is a film.
